Professional Summary

Full-stack developer with 2+ years of professional experience delivering scalable web applications and intuitive UI/UX designs utilizing the React ecosystem. Specialized in harnessing AI workflows and robust backend integrations (GraphQL, Prisma, Docker) to rapidly deploy accessible, high-performance software.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, C++
Frameworks & Libraries: React, Node.js, Next.js, Express.js, GraphQL, Prisma, Drizzle ORM, three.js, TailwindCSS
AI & Integrations: OpenAI/Anthropic APIs, RAG architecture, HiggsField AI, Replit, n8n, Zapier
Databases: PostgreSQL, MySQL, MongoDB, Firebase, Supabase
Cloud, DevOps & Tools: Git, Docker, AWS, Azure, CI/CD, Vercel, Cursor, GitHub Copilot, Figma, Lighthouse, PostHogAI, BetterAuth

Work Experience

Software Developer August 2025 - October 2026
Webvar/MaxTech *Calgary, AB*

- Spearheaded the ground-up development of Helm, a multi-tenant security control plane built on CrowdStrike Falcon utilizing React 19 and TypeScript to enable MSPs to monitor cross-tenant telemetry.
- Architected a scalable backend utilizing Hono, tRPC 11, and Drizzle ORM to process live endpoint telemetry and compute risk fields, automating the dispatch of client-ready monthly security assessments.
- Integrated BetterAuth for robust access control and PostHogAI for user behavior tracking, successfully merging 250+ pull requests within a strict two-month launch window by leveraging optimized AI workflows.

Front-end Developer February 2025 - August 2025
Empowered Futures *Calgary, AB*

- Engineered responsive React UIs, collaborating directly with design teams to translate wireframes into accessible web components, improving accessibility scores to 98%.
- Optimized database query performance using GraphQL and Prisma, containerizing the application with Docker to ensure consistent deployment across development stages.

Full-stack Developer November 2024 - July 2025
New Idea Machine *Calgary, AB*

- Engineered a real-time contractor management system using React and Firebase, enabling secure data retrieval and scalable NoSQL document storage.
- Implemented React Context for global state management, establishing a highly reusable component library and improving frontend performance by 30%.

Projects

Connecton | *React 19, three.js, Supabase, PostgreSQL, Gemini AI, Tailwind, PWA* October 2026

- Architected a 3D personal relationship management PWA utilizing react-three-fiber and a strict PostgreSQL rules engine to gamify social check-ins, currently supporting 5 active users in production.
- Engineered a backend Supabase architecture featuring Row-Level Security, automated Edge Functions (cron), and Gemini AI integration to securely generate context-aware message drafts and web push reminders.

Impact Tracker | *TypeScript, Express 5, Drizzle ORM, PostgreSQL, Webhooks* September 2026

- Developed a secure backend webhook service to transform Linear tickets and merged GitHub pull requests into a unified PostgreSQL shipping ledger.
- Implemented strict HMAC-SHA256 signature verification to ensure endpoint security, discarding unauthorized payloads and utilizing unique IDs to prevent duplicate database entries.

Education

Bachelor of Technology - Software Development Major September 2023 - April 2027
Southern Alberta Institute of Technology *Calgary, AB*

- Overall GPA: 3.90
